

07:15 Registration and Coffee

08:00 Welcome & Introduction

Fares Haddad

Session 1 Hip Preservation

Chairs: Fares Haddad / Anders Troelsen

- | | | |
|-------|--|--------------------------|
| 08.05 | Imaging interpretation of the young adult painful hip | <i>Oliver Marin</i> |
| 08.12 | Patient selection for hip arthroscopy: demographic, radiographic and artificial intelligence factors | <i>Kartik Logishetty</i> |
| 08.19 | Modern management of the labrum | <i>Callum McBryde</i> |
| 08.26 | Is Tonnis grade effective at distinguishing between who will benefit from hip preservation or joint replacement surgery? | <i>Tony Andrade</i> |
| 08.33 | Hip arthroscopy in PAO: saviour, sidekick, or saboteur? | <i>Jonathan Hutt</i> |
| 08.40 | Dysplasia in adults - PAO vs arthroplasty and how to decide in patients over 40 | <i>Georgi Wassilew</i> |
| 08.47 | Beyond cam and pincer - impingement in 2026 and the growing role of version | <i>Alastair Dick</i> |
| 08.54 | Extra-articular hip impingement: A new entity? | <i>Oliver Marin</i> |
| 09.01 | Where are emerging technologies driving change in hip preservation surgery? | <i>Tony Andrade</i> |
| 09.08 | Discussion | |

Session 2 Fracture

Chairs: William Maloney / Justin Cobb

- | | | |
|-------|---|---------------------------|
| 09.25 | Osteosynthesis vs arthroplasty in elderly patients with a stable neck of femur fracture | <i>Geert Meermans</i> |
| 09.32 | Dual mobility in hip fracture - results from the DUALITY study | <i>Olof Sköldenberg</i> |
| 09.39 | THA after failure of proximal femur fixation | <i>Luigi Zagra</i> |
| 09.46 | THA in patients with a prior surgery on the acetabulum | <i>Eduardo Garcia-Rey</i> |
| 09.53 | The use of a PENG block in the non-operative care of elderly patients with a neck of femur fracture | <i>Geert Meermans</i> |
| 10.00 | Periprosthetic fractures - optimising care | <i>Carsten Perka</i> |
| 10.07 | Discussion | |

10.20 Coffee & Exhibition

Session 3 Primary THA

Chairs: Sujith Konan / Carsten Perka

- | | | |
|-------|---|-------------------------|
| 10.50 | Stem choice in THA - what does the data say? | <i>Edward Davis</i> |
| 10.57 | Short stems in young active patients - a bone-preserving long-term strategy | <i>Georgi Wassilew</i> |
| 11.04 | Customised primary THA - is there a role? | <i>Andrew Manktelow</i> |
| 11.11 | Uncemented stems above the age of 75. Asking for trouble? | <i>Krisztian Sisak</i> |
| 11.18 | Trends in hip replacement in the US. | <i>William Maloney</i> |
| 11.25 | Discussion | |

Session 4 Primary THA

Chairs: Andrew Manktelow / John Skinner

- | | | |
|-------|---|----------------------------|
| 11.40 | Hip-spine relationship and its impact on THA planning and outcomes | <i>Pascal Kouyoumdjian</i> |
| 11.47 | Should we restore the offset in complex developmental hip dysplasia during THA? | <i>Luigi Zagra</i> |
| 11.54 | Selection of approach for THR. Does it matter? | <i>William Maloney</i> |
| 12.01 | Gait after hip resurfacing: a prospective 5-year study confirms substantial superiority over total hip arthroplasty | <i>Justin Cobb</i> |
| 12.08 | Indications for ceramic hip resurfacing: the influence of age, gender and size on outcome. | <i>Andrew Manktelow</i> |

- 12.15 Hip resurfacing - are there still non-ceramic options? *Callum McBryde*
 12.22 Late complications after hip resurfacing *Kris Govaers*
 12.29 Discussion

- 12.45 Inequalities of access and outcomes of NHS funded THR in the independent sector *Jonathan Evans*
 12.52 Is safe, early mobilisation better with spinal or general anaesthesia after THA? *Anders Troelsen*
 12.59 A stepwise approach to surgical training in hip arthroplasty *Kris Govaers*
 13.06 Discussion

13.15 Lunch & Exhibition

Session 5 Discussions of Complex Cases

Moderators: Andrew Manktelow / Oliver Marin / Callum McBryde / Kathryn Gill

- 14.15 Faculty panel debate of complex cases. Approaches, techniques and outcomes *Arthroplasty Faculty*

Session 6 The Changing Face of Hip Surgery

Chairs: Luigi Zagra / Geert Meermans

- 15.00 What is the osteolytic potential of three different contemporary bearing couples at 5 years
Anders Troelsen
Henrik Malchau
William Maloney
 15.07 Antibiotic-loaded UHMWPE - an update
 15.14 Update on VTE prophylaxis from the PEPPER trial
 15.21 Activity and mortality after hip arthroplasty: UK Biobank data with 20 yr results *Justin Cobb*
 15.28 A practical update on robotic assisted THA *Fares Haddad*
 15.35 What does RACER say? *Edward Davis*
 15.42 Discussion

16.00 Coffee & Exhibition

Session 7 Revision Scenarios

Chairs: Fares Haddad / Henrik Malchau

- 16.30 The role of 3D planning in revision THA: Clinical applications *Eduardo Garcia-Rey*
 16.37 Mix and match in revision THA: review of techniques and outcomes *Sujith Konan*
 16.44 Dual mobility in high-risk osteoarthritis patients - long-term outcomes and markedly reduced dislocation risk
Olof Skölden
Jonathan Evans
 16.51 Up to date registry evidence on dual mobility
 16.58 Surgical management of recurrent hip dislocation *William Maloney*
 17.05 Discussion
 17.12 Short modular versus long non-modular stems in RTHA with moderate bone loss?
Gijs Van Hellemond
Carsten Perka
 17.19 Solutions for complex bony defects
 17.26 Early RSA results of 3D custom implants: how stable is the construct?
John Skinner
 17.33 An update on DAIR *Gijs Van Hellemond*
 17.40 One-stage vs. two-stage revision for PJI - real-world outcomes, healing time and functional recovery in a contemporary cohort (EBJIS-based)
Olof Skölden
 17.47 Periprosthetic joint infection: The enduring role of two-stage revision *Sulaiman Alazzawi*
 17.54 Discussion

18.00 Close of Meeting

Fares Haddad
